## A STRIKING AND PROFITABLE OFFER FOR YOU.

The Stony Plain Sun and  
The Family Herald & Weekly Star

Both  
Together  
For **\$1.65.**

Here is a Combination Offer which Every  
Reader should profit by.

The Stony Plain Sun is \$1.50 a year.  
The Family Herald & Weekly Star is \$1.

By subscribing thru this attractive combination  
offer at \$1.65 you are offered a clear saving of \$1.00,  
a saving well worth considering.

The Stony Plain Sun, which no resident of this  
locality can well afford to be without, while featuring  
general Dominion news, keeps you in touch with ev-  
erything of importance in this district.

The Family Herald & Weekly Star, the national  
rural magazine and farm paper of Canada, brings you  
the up-to-date in farming news, a weekly magazine of  
fine stories and special articles, and a digest of all the  
news of importance, Canadian and world-wide.

SUBSCRIBE TODAY TO THIS HAPPY AND HELP-  
FUL COMBINATION. THE TWO MOST NEEDED  
PAPERS FOR YOUR HOME FOR ONLY \$1.65.  
ADDRESS YOUR REMITTANCE FOR THIS OFFER  
TO THE STONY PLAIN SUN.

### Benny Tait Issues a Challenge

The Sporting Editor has re-  
ceived an epistle from Mr.  
Benny Tait, the well-known  
pugilist, in which Benny re-  
quests that a challenge be is-  
sued on his behalf to Mr.  
Paul Schneider of Haliburton  
district. Benny suggests that  
the contest, if arranged, take  
place in Stony Plain, in pref-  
erence to other places. Benny  
figures that he's getting back  
to the good shape he used to  
be in a couple of years ago.

At Legal, last week, Benny  
out-pointed Roland Dorvonn  
of Legal in 5 rounds, and  
made a pretty fair hit with  
the crowd. There were about  
500 present.

The Sporting Editor would  
be pleased to hear from Mr.  
Schneider or his manager.

### Jepperson—Priests.

A pretty wedding was cel-  
ebrated at the First Baptist  
church, in Leduc, on Wed.,  
Nov. 30, when Miss Arpa  
Priest, daughter of Mr and  
Mrs Louis Priests of Millar,  
became the bride of Mr Laur-  
ard Jepperson, son of "Mr and  
Mrs Jean Jepperson of Spruce  
Grove.

The bride, who looked very  
charming in a gown of white  
satin and lace, and carrying a  
bouquet of white chrysanthem-  
ums, entered the church on  
the arm of her father to the  
strains of a Bridal Chorus,  
played by Miss M. Priests, a  
cousin of the bride.

The bride was attended by  
Miss Alice Priests, who wore  
mauve, and carried yellow  
chrysanthemums.

Arthur Jepperson, brother  
of the groom, assisted the  
bridegroom.

Rev P. Daum officiated.

After the ceremony the  
guests, about 60 in number,  
gathered at the home of the  
bride's parents, where a sumptu-  
ous dinner was served.

The bride was the recipient  
of many gifts. The happy  
couple have taken up their  
residence on the bridegroom's  
farm, in the Spruce Grove dis-  
trict.

### Mo. Lk. for Steer on the Head

At the auction sale of market  
cattle which wound up the agri-  
cultural end of Toronto's Royal  
Winter Fair last week, some of  
Alberta's prize head cattle were  
sold at excellent prices.

The Alberta University's cham-  
pion steer was sold to a depart-  
ment store for 115 a lb.

The University's champion An-  
gus steer brought 115 a lb. and the  
Holland champion 115 a lb.

The C.P.R. prize winning milch  
Angus steers, averaging 1125  
lbs. apiece, was sold for \$1, a lb.  
to the Royal York Hotel, Toronto.

### Birth.

Rev H. L. and Mrs. Hennig,  
from Manville, have been  
blessed with a daughter. The  
mother and child, who are  
now in Stony Plain with their  
folks, are doing real well.

## Suitable for Xmas Gifts!

INDIVIDUALLY BOXED:

Ladies' Fancy Silk Knit Scarf and Beret Sets,  
Quite the latest thing, boxed, \$1.25.

Silk Princess Slips, shadow proof, boxed, \$1.25.

Men's All Silk Ties, boxed, 39c. and up.

Men's Rayon Scarves, boxed, 39c.

Towel Sets 59c. Mama Dolls 55c.

Grocery Specials---a few of them:

Mixed Peel, 1 pound packet 21c.

Royal Bouquet Toilet Soap 2 for 11c.

Saltines, 5 packets for 50c.

## HARDWICK'S

DON'T BUY IN THE DARK.  
SPEND YOUR MONEY  
FOR ADVERTISED GOODS.

## YOUNG'S STORE

PHONE 48

We have a Fresh Stock of Choice Groceries  
at Lower Prices. A trial will convince you.

This week's Special: Buffalo Flour, made  
by Royal Household Mills, single 94-lb. sack  
\$1.65; in 5-sack lots \$1.60; 10-sack lots \$1.55.  
Cash prices.

## Guaranteed Used Cars!

1926 Chevrolet Sedan, complete- ly overhauled	\$300
1930 Chevrolet Sedan, just like new	\$650
1932 Chevrolet Light Delivery, just like new	\$750
1930 Chevrolet Coach, recondi- tioned and all new tires	\$350
1929 Chevrolet Coach, recondi- tioned, good tires	\$325
1930 Chevrolet Truck, recondi- tioned, new body	\$475
1929 Ford Truck	\$350

Sommerfield & Mayer  
STONY PLAIN.

## Pain Around Her Heart Went Out After Being Discovered

She, Emily Smith, 40, of Lethbridge, Alberta, writes:—"Last fall I had bad pain around my heart, and each morning after doing a little housework, I would get sharp pain that all but killed me."

Being that Milburn's Heart and Nerve Pills were good for these troubles I sent for a box, and after taking the pills for a few days I felt a whole lot better. Since then I have had no return of the sharp pains and pain around the heart."

For sale in all drug and general stores, and up also to the V. Medicine Co., Ltd., Toronto, Ont.

## British-U. S. War Debts.

At the time this article is written, President Hoover and President-elect Roosevelt are in conference giving consideration to applications made by the British, French, and other Governments which are indebted to the United States for loans made by the latter during the war, for an extension of the two-year moratorium covering repayments granted last year, and generally for a revision of the terms of settlement of such debts.

Inasmuch as these enormous international war debts are admittedly one cause of the existing financial and economic depression affecting all nations, whether they are directly concerned as debtors or creditors or not, it is well that the general position in regard to these debts should be understood in its broad outlines.

The war debts of the nations of Europe to the United States total approximately \$21,143,538,446, of which amount Great Britain owed \$11,146,946,000, and has paid almost \$2,800,000,000; France owed \$6,947,674,000 and has paid \$446,075,891; Italy owed \$2,497,877,000 and has paid \$67,584,432, with the smaller nations owing varying amounts. Repayment of these huge amounts were to be made within a period of approximately 40 years.

On the other hand, Germany was obligated to pay these allied European nations the sum of \$20,377,040,000 during a like period of time. In other words, as Germany paid her debts to the Allies, they in turn could pay the United States. But Germany cannot pay; the whole world now recognizes that fact. So at the Louvaine Conference last June, Great Britain and the other nations agreed to let Germany off for \$114,000,000 instead of \$20,377,040,000, provided the United States would radically reduce or cancel the war debts due to that country. This the United States has thus far refused to do.

The Allies carried on the war against Germany for three years before the United States entered the conflict. Some of them had completely exhausted their credit in those three years and would have collapsed, the result of which might easily have been a German victory. Great Britain came to their rescue. But while Great Britain could have continued to finance all her own stupendous war expenditures, she could not do so and at the same time finance her allies. So Great Britain borrowed from the United States and, in turn, financed these other allied countries. They cannot repay Great Britain, nevertheless Great Britain is obligated to repay the United States, and, as the above figures indicate, has been doing so. As a result Great Britain was drained of gold; had to go off the gold standard; and now, because of failure of Germany to pay her, or pay other European nations which are so heavily indebted to Great Britain, it is no longer possible for Britain to continue paying out to the United States when others are not, because they cannot pay her.

Furthermore, in the huge borrowings by Britain and other countries from the United States, the latter country did not actually lend them gold. What the United States Government did was to advance them credit whereby to buy food supplies, munitions, raw materials and manufactures of all kinds in the United States. In other words, the money was practically all spent in the United States in enormously high war prices for farm products, in war-time wages to workers, in war-time profits to manufacturers and people generally. The people of the United States prospered while Europe was impoverished.

With the ending of the war, and the necessity of paying off these huge credits the United States Government demanded payment in gold. The United States, we repeat, did not lend gold but sold supplies of all kinds on credit; then they refused to take supplies back in repayment but demanded gold. In order to prevent repayment in supplies they raised their tariff to prohibitive heights and shut out foreign goods. In so doing they killed off the export trade of the debtor nations, thus making it still harder, in fact impossible, for them to pay.

Great Britain has never defaulted in payment of its obligations to any one at any time. Repudiation of obligations has never been contemplated by Great Britain, although it has been the victim of such practices by other countries, including several of the States of the United States. Britain has no desire to default now, and years ago offered to write off the debts owing to her if her own debts, created by borrowings to assist these other nations, were similarly written off. The world's financial and economic troubles today are not due to Great Britain, and had her advice and example been followed after 1918 there would be no trouble.

If the United States still remains adamant, if it refuses to cancel or very substantially reduce the amounts owing to that Government, and continues to insist on payment in gold, then, in our humble opinion, the stand to be taken by the British Government should be this: Payment in gold being impossible, and in view of the fact that the debt was created through the supply of goods produced or manufactured in the United States, thus creating employment and wealth in the United States, Great Britain should now offer to repay the United States by exactly the same method,—that is, by supplying the United States with goods produced or manufactured in Great Britain, or through services, such as shipping which Britain can supply, thus providing employment for Britain's unemployed, and producing wealth for Britain's over-taxed people and institutions.

Until the United States is prepared to accept such British credits in exchange for the credits extended to Britain, that is, to accept British goods and services in payment for the United States goods and services supplied, Great Britain, while not repudiating anything, would refrain from making any further payments in gold, and let the United States wait for any further settlement until that country is prepared to accept the same treatment from Britain that, in the hour of the world's extremity, the United States accorded to Britain. Could anything be fairer?

## Wool Trade

Believes New Trade Agreement With Britain Will Be Beneficial

Both Canadian and British woolen manufacturers should enjoy greater business in the Canadian market, in the long run, as a result of the change in the textile tariffs effected by agreement at the Imperial Conference, declared H. Barrett, of Toronto, in his presidential address to the annual meeting of the Canadian Woolen and Knit Goods Manufacturers Association.

Addressing the members who had gathered from all parts of Canada, Mr. Barrett devoted the greater portion of his address to the Imperial Conference and its effects on the woolen industry.

"The improvement of Great Britain's position in the Canadian market," he said, "will be partly at the expense of employment in the Canadian mills and partly at the expense of mills in non-empire countries. But as the preferences on our primary products become effective the market in Canada for wool products should increase so that the total effect should be to increase business done in Canada by both Canadian and British mills."

## Whistling Pigeons

Birds Used By Ontario Provincial Air Force To Carry Messages

Travelers in the north woods of Ontario next summer may be astonished when they hear and see what they may take to be a new species of bird, and into their hands may pop visions of whistling swans and wild pigeons. They may see the birds, real pigeons, and hear the whistle, but the two are separate entities, joined it is true but only for a space and then to carry out an idea.

Next spring, after a period of training, teams of homing pigeons will be transported to various fire patrol points where communication by wireless is now difficult or impossible. Reports of fires, forced landings and important messages may be relayed by the use of these birds in the lone camps of the Provincial Air Force. The whistle! That is to scare away hawks and other predatory birds that might attack the homers, and it is attached to their legs along with identification tags.

Persian Balm—Invaluable to the whole family. To the mother, a flawless aid to loveliness. To the child a soothing, healing balm. And to the father, a splendid hair restorative and cooling shaving lotion. Persian Balm tones and refreshes the skin. Makes hands delightfully soft and white. Indispensable to dainty women. A little rubbing and it is absorbed by the tissues, making the skin truly rose-leaf in texture.

## Decide To Advertise

Smartest Taking Best Way To Solve Coffee Problem

Having failed to solve the coffee problem in Brazil by destroying the beans and after trying out numerous schemes, the Coffee Council of Brazil has finally decided the best thing to do is to advertise the coffee and sell it.

One million dollars has been set aside for an intensive advertising campaign in North America. There is no better way to move goods than to advertise them. Successful business men discovered that long ago.

Useful In Camp.—Explorers, surveyors, prospectors and hunters will find Dr. Thomas' Electric Oil very useful in camp. When the feet and legs are wet and cold it is well to rub them freely with the Oil and the result will be the prevention of pain in the muscles, and should a cut, or contusion, or sprain be sustained, nothing could be better as a dressing or lotion.

## The McIntosh Is Popular

Popularity of the "McIntosh Red" apples grown in Canada is evident from the fact that the whole of this year's crop grown in Western Canada has already been marketed. More than 300,000 boxes of these apples have been shipped to the domestic and export markets.—Department of Agriculture.

Small is requiring all gold miners to sell their product to the government.

## The Hardest Shooting Club

Small Arms Committee Practices Shooting At Cardboard Figures

A shooting club for criminals where they could practice firing at cardboard figures of policemen was discovered by authorities at Buenos Aires with the arrest of one of the band. A letter from the women proprietor of the club, found in the captured man's possession, revealed the location of the range.

On finding the house the police found a 30 ft. underground shooting range and three gunners anxiously practicing their marksmanship. The range was lined with soundproof boarding and fitted with the latest appliances. Blue cardboard figures of policemen, both moving and stationary formed the targets. The scores of the shooter were kept in a card index.

## Well Repaid For Kindness

King George and Queen Mary Enjoyed Shooting With Koller

The kindly majesty of England, the King and Queen, never performed a more gracious act than, when they received internally Helen Koller, the marvelous deaf and dumb and blind American woman, who has surmounted her terrible handicaps in such a wonderful manner. And their kindness was well repaid, for after conversing with Miss Koller, they marvelled at her attainments just as have all of us who never had the privilege of meeting her.—Boston Post.

Makes Breathing Easy. The constriction of the air passages and the struggle for breath too familiar evidence of asthmatic trouble, cannot defeat Dr. J. D. Kellogg's Asthma Remedy. This is the famous remedy which is known far and wide for its complete effectiveness even under very severe conditions. It is no untidy, experimental preparation, but one with many years of strong service behind it. Buy it from your nearest dealer.

The 100-year-old elm at Chelmsford, Essex, England, beneath which Milton and frequently, was felled recently.

There are supposed to be 300 holes in the science of jujitsu by which a man can be quickly thrown.

## Think Canadian Fur Ranch Will Disappear

For Importers French Are Shipping With General Furs

Complete disappearance of the fur ranch in Canada, is predicted by Leon Chapel, managing director of Les Magazines Generaux du Marche Francaise, for importers. Mr. Chapel feels that fur farming will become merged with general farming, as there is not sufficient market for make it worth while for a man to devote his whole time to it, while it fits in admirably with mixed farming.

Mr. Chapel was in Montreal en route to Prince Edward Island to make a survey of the fur ranching industry there. No competition exists between Russia and Canada, he said, as the furs produced by the two countries are of different types. Canada deals in silver fox and other furs of that variety, while Russia produces white fox and sableskins.

All Canadian furs, except the small quantity bought in the Dominion, are purchased by Parisian interests, Mr. Chapel said. Even Americans are buying Canadian furs in Paris because his firm had sold more furs in August and September of this year than ever before in its 40 years of existence.

Eggs vary in weight from 10 to 32 ounces to the dozen.

As love thinks no evil, so envy thinks no good.

# KEEPING FIT

Made in Canada

Indigestion is rich foods, tobacco, or anything else that piles up acid in the system should be offset with a little Phillips' Milk of Magnesia. This neutralizes the acidity and you feel fine. Plenty of men know there is nothing like it for "morning after." Get the genuine; there's something about the Phillips formula, and the way Phillips' is made. Substitutes don't get the same.

Also in Tablet Form. Phillips' Milk of Magnesia Tablets are now on sale at drug stores everywhere. Each tiny tablet is the equivalent of a teaspoonful of genuine Phillips' Milk of Magnesia.

## DON'T NEGLECT STOMACH DISORDERS

ACIDITY, INDIGESTION, BILIOUSNESS, CONSTIPATION, INDIGESTION, ARE FORE-RUNNERS OF MORE SERIOUS TROUBLE TO FOLLOW UNLESS CORRECTED IMMEDIATELY

## ACTON'S STOMACH TABLETS

have brought prompt and positive relief to thousands of sufferers by gently soothing inflamed condition and enabling the stomach organs to function as nature intended. GENUINE ACTON'S ARE SOLD ON A MONEY BACK GUARANTEE AT 50¢ PER DOZEN.

1 Box Trial Treatment, \$1.00. 10 Box Full Treatment, \$10.00.

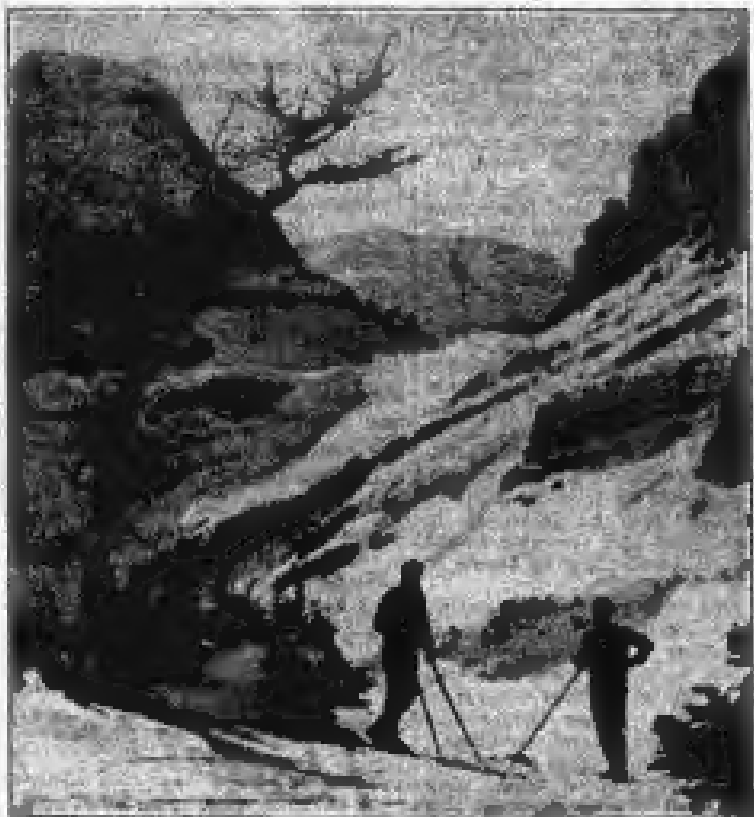

ACTON LABORATORIES (WESTERN)  
207-A Seventh Ave. East CALGARY

## Winter Sports In Canada Are Attracting Increasing Numbers Of Visitors To Dominion

The invigorating stimulus of a typical Canadian winter, now regarded as an advantage rather than a hardship, owing to the unusual variety of beautiful and appealing sports, is attracting increasing numbers of visitors to the Dominion.

Across Canada there are many beautiful and attractive snow-clad mountains, hills and valleys, which offer exceptional opportunities for enjoying a wide variety of outdoor winter sports. The principal activities throughout the country are skiing, snowshoeing, skating, tobogganing, curling, hockey, ice-skating and

but a preference is shown for hockey and curling. In the province of Quebec the major sport events centre in and around Montreal, Quebec City, Murray Bay and the Laurentian mountains. Lovers of winter sports will find vast territories in Ontario which are ideal in location and in scenic beauty. Ottawa, the federal capital, is adjacent to some of the finest skiing country on the continent, while the best of ice-yachting may be enjoyed in Toronto Bay and along the waterfront of Lake Ontario. In the Muskoka and Algonquin Park districts, hotels and cabins are open for the accommodation of winter visitors.

dog sledding, all of which may be thoroughly enjoyed under ideal conditions. With the exception of an occasional day during mid-winter, the temperature is not too cold for participating in outdoor sports.

While motor travel is not general during the winter season, there are many long stretches of highway which are kept conditioned throughout the winter months. The traveller will always find train service a modern and luxurious means of transportation. Hotels in many of the leading summer resort districts remain open the year round, providing good accommodation for those wishing to participate in local winter events.

Each province possesses winter attractions more or less peculiar to its own particular surroundings. Practically all forms of winter sport are available in the Maritime Provinces.

In Manitoba the Winnipeg Winnipeg also the winter carnival held at The Pas, are annual events of international interest, while Banff, situated in the scenic Canadian Rockies in Alberta, is one of the most important centres for winter sports. Record performances in ski-jumping have been witnessed at Revelstoke. The islands and mainland of the south-western part of British Columbia offer golf, tennis and other summer sports, for the winter visitor.

Information concerning winter sports in Canada may be obtained from the National Development Bureau, Department of the Interior at Ottawa. Those who desire such information should state, if possible, the particular district or districts in which they are interested, in order that the most complete data may be supplied.

### Cross Of Lark Day

Nothing Was Attracting Further and Sweeter Was Expected

This being a knitting era as far as recreation and leisure are concerned, it reminds one of an earlier day when the cross was setting. The shuttle, or knitting-needle, was very expensive in the 16th century, and the pastime an amusing one. Women used this costly tool in making a kind of narrow lace known as knitting. Today we would call it fooling.

This gave fashionable women an excellent opportunity to display dexterity and bejewelled hands. Emulated knitting needles cost as much as \$40 in some cases. The Marquis de Pompadour had a pair that cost \$27.50, and the Comtesse de Provence gave Mme. de Beaumont a gold knitting-needle decorated with miniature paintings worth a fabulous sum. The estate of the Duke of Lorraine was found to contain, on his death, in 1781, seventeen knitting-needles in amber, rock-crystal, gold, mother-of-pearl, agate, petrified wood—all set in gold.

Berlin has started a drive against money-spinning.

It is illegal to tip Pullman porters in Austria.

W. M. U. 1972

### Weather Forecaster Dead

Prophetic Of Chicago But Called Many Wages

The familiar phrase "no hole with Barrett" will no longer be heard on the Chicago Board of Trade. The prophet John F. Barrett is dead.

Barrett, considered the city's most accurate weather "long-distance" weather forecaster, died recently after a brief illness.

He was born in 1845 and lived his life on the board by his successful weather forecasting. In 1891, he won \$1,000 on his prediction. Barrett said there would be no more on the thermometer from December 1 to March 24. He was right.

As a matter of fact, he was right as many times that the "smart boys" decided they were licked. There were no more "holes" and the "no hole with Barrett" was frequently said.

Barrett's weather prophecies were watched closely. It was a frequent occurrence to take in local newspapers what "Barrett, Chicago's unofficial weather-man," predicted.

A recent check-up on his forecasts, that extended over a period of more than 50 years, showed him to be correct 95 per cent. of the time.

Although 71, Barrett was one of a small group who had held continuous membership on the Board of Trade for 50 years or longer, having become a member of the exchange April 1, 1861. He was a director of the board 1897-99.

The "weather prophet" was known as a "wise" buyer of cash grain. His skill in forecasting the weather and the size of the future grain crops added him to business dealings.

While many grain operators looked to Barrett for "tips" on the weather, there were a few who figured his forecasts only lucky. A few late, however, convinced them otherwise.

Barrett's success was attained by developing a system of observing the course of the wind on Kinner week, a period in the Catholic Church Calendar.

### Prominent Shooting

Accidents During Shooting Season Each Year Are Appalling

Has any man any right to fire a shot, without knowing what he is firing at? The tragedy which has haunted the woods this fall is almost unbelievable in its magnitude and its carelessness. A man is shot, the shooter taking him for a partridge. A man is shot, the hunter mistaking him for a bear. A woman is shot, the sportsman thinking he was firing at a mouse. An ox is shot in mistake for something else. A man was shot as he went into the woods to drive his cattle home. A man mowed the bushes and a shot brings him to the ground, the shooter firing at the moment in hope of bringing down a mouse. And so the tragic story unfolds itself, day after day, the wires bringing in their tale of dead and wounded. Halifax Chronicle.

And if you don't think Professor Piccard flew clear out of the dictionary try to find the word stratosphere.

## British Polar Year Party Tells Of Work Accomplished At Their Bear Lake Station

### Interesting Old Records

British House Of Commons Has Wonderful Reference Library

The library of the British House of Commons today is well stocked with history, political biographical and law books—one of the best reference libraries of its kind in the world.

Yet 150 years ago, two years before the Palace of Westminster, the old House of Parliament, was burnt down, a committee was appointed to look into the affairs of the library, and found it "very imperfect." Among other things, they discovered a "post-office bag of unopened letters of the year 1694. So much for confidentiality who wrote to their members in those days. For the rest not even a copy of the Acts was bound in the library, and valuable space was given up to books which had no bearing on political matters.

The library contains many interesting old records moved from the old. Among them the official journals, records of debates and proceedings, which until 1743 when they were printed were presented written in the recording clerk's hand. There is the record of Cromwell's famous descent on the House when he discovered the "Whigs," and another records the visit of Charles I. to arrest the five members. Both these entries are in so shaky a hand as to indicate plainly the clerk's agitation.

### Advice For Piano Owners

Time and Condition Depend On Where It Is Placed

In deciding where to put the piano, both time and condition have to be considered. A rug under a piano tends to drain the sound. If possible, it should stand on bare boards, or, if the rug goes all over the room, wooden insulators set under the casters. Time is also lost when an upright piano stands back against a wall. Put it at an angle, or pull it out two or three inches from the wall.

Special protection must be taken against damp. A piano should be kept in a warm, well-ventilated room. Placed close to a window, or against an outside wall, a piano is exposed to damp air. Strings become rusted and the glue of hammer felt is loosened. A little charcoal laid at the bottom of the case inside the lower front panel is a good protection from damp. Moths in the hammer felt can be guarded against by hanging little bags of camphor or cedar chips inside.

Ivory keys turn yellow if the key-board remains shut up, so leave them exposed to the air as much as possible. They may be whitened by rubbing them with a soft rag dipped in lemon juice. Boiled keys are easily cleaned with methylated spirit.

Don't put up with a squeaky pedal; a touch of blacklead will cure this.

Writing from Fort Ross, North West Territories, J. M. Stagg, leader of the British Polar Year expedition party, has sent out a description of the safe arrival of the party and their work during the first few weeks at their station on Great Bear Lake. The party will study, among other phenomena, the Aurora Borealis or northern lights.

The British party were interested to see the Canadian Airways Service taking prospecting parties up to the recent state of pitchblende, gold and silver on the northern shore of Bear Lake, 200 miles further north than Fort Ross. But the British party gave the novel thrill to the Indians of working up Indians daily. As it happened that they had an unusually long winter period in August, the Indians connected it with the occult influence of the Indians, and when a thunderstorm came with a lightning flash to ground near the settlement, never then they had ever seen one before, the Indians were confirmed in their belief that the strange whites were practitioners of magic.

Looking forward to being frozen in for about nine months, with a vast programme of scientific investigation mapped out for them, the party carried a lot of impediments. Their instruments and food equipment for six men was in over 500 cases. They were kindly provided with living quarters by the Hudson's Bay Company and the Royal Canadian Mounted Police, but they had to turn dressed Indian skulls into laboratories and observatories. One shack had to be made light-proof, heat-insulated and non-magnetic to house the photographic recording magnetic instruments by building a double-walled chamber with wood-wool in the interspace and then filled with a double-door and piled up with turf and muskox outside.

Another old log hut was fitted for the manufacture of hydrogen and the filling of balloons. A third had to house the engine generator and storage battery for the continuous lighting of the photographic recording instruments. Another hut became the main meteorological observatory and office.

As early as July the investigators had the pleasure of noticing the aurora and during August there was a display every evening. As all the magnetic recorders had been put in working order, observations were made from the start and Mr. Stagg writes with evident gratification, "We must be near, if not actually inside, the zone of maximum auroral activity."

### Dry Canadian Snow

Shows Of Winter Are Dry, Soft, and Fluffy

Some sections of the world profess to have such a climate that their rains are dry rains, and for the most people a statement of this nature is hard to believe. Canadian snow, however, will be a treat to those only familiar with flakes that fall and immediately turn to a dull grey and a dan mass. In the greater part of the Dominion the snows of winter are dry, soft and fluffy, do not cling to one's garments, and even a fir a day of play in the open, skiing or sliding on Nature's white cushion, a slight shake or brushing removes all trace. So dry is the snow that at times it is impossible to mould the crystals into a snowball.

### Shelly Boregarden

The ropes in the English Army, from the greatest to the smallest, are so twisted that a scimitar thrust runs through them from end to end, yet cannot be extracted without shaking the whole; and, by which the most precious may be recognized as belonging to the Crown.

The mouse trap is truly a marvelous thing. It stays working the minute you walk up and never stops until you get to the office.

Aviation is all the fashion is popular in Germany this year.

### ENDING THE BLAME OF THE BRAPER

This spectacular picture, made during the 150-mile run for the championship of the United States of Oakland, California, shows an accident at the instant it happened. The car, driven by Lee Spangler (nearest the camera), is shown as it skidded another entry, so both were going at a terrific speed on a hair. Spangler's car hurtled completely over, but the occupants escaped with comparatively minor injuries.

## WORLD HAPPENINGS BRIEFLY TOLD

Political considerations will be cast aside in the selection of men for the tariff board, Premier R. B. Bennett promised the House of Commons.

Friend of Louis Riel and the man who brought the rebel's body to Winnipeg for burial after his execution in Regina, in 1885, Arthur Bower, is dead in his 73rd year.

A total of 187 Japanese and one Chinese were admitted to Canada from June, 1932, to November 1, 1932, according to a return tabled in the House of Commons.

Albert Lawrence Lowell, 75, one of the world's noted educationists and for the past 25 years president of Harvard University, has resigned. No reason was given.

Liquor licenses for British Columbia under the government liquor board for this year is off 40 per cent, according to a preliminary report accepted by government auditors for the information of the cabinet.

First shipment of its kind, some 12,000 tons of Russian fuel oil arrived at Montreal recently. Since September three shipments of crude oil from Soviet Russia reached the Montreal port.

A group of Harvard undergraduates have begun organization of a permanent "Harvard League of Nations," in which students from all countries represented in the university would have membership.

Blue stock Alaskan sled dogs headed out of Copper Centre, Alaska, on November 20, on route with their driver, Clyde Williams, veteran of 21 years of prospecting, trapping and working in the northland, on an overland trip to Chicago.

Canada gave whole-hearted support to any and every constructive proposal for the limitation and reduction of armaments which was laid before the Geneva disarmament conference. Sir George Perley, who headed the Canadian delegation, informed the House of Commons.

Douglas' Egyptian Liniment relieves toothache and neuralgia. Invaluable in cases of croup, sore throat and colic. Keep a bottle handy.

### Man in New Business

Constant There is Room For Them As Handouts

Entering a field hitherto belonging exclusively to women, six Edmonton young men have finished training as manicurists. And they're deadly serious about it.

The head of a prominent school of beauty culture in the east gave them their training. Economic conditions forced them into this experiment, but they don't intend to compete with women manicurists. There's room in the field for both, they say.

## Government May Remove Some Dumping Duties

Certain Imports From Great Britain Are Under Consideration

The Canadian Government is giving "serious consideration" to removal of exchange dumping duties from certain imports from Great Britain. This was announced in the House of Commons by Hon. M. H. Stewart, Minister of Trade and Commerce.

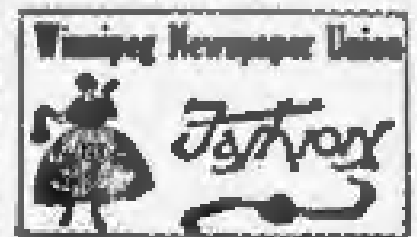

Canada promised "sympathetic consideration" under the Anglo-Canadian treaty to removal of currency dumping duties from British imports.

### A Pocket Sheep-Shearer

Small Machine Can Shear From Lighting Battery Of Car

A small machine for shearing sheep weighing only five pounds, has been invented for use with the lighting battery of a motor car.

Many modern shepherds in Britain go to and fro by car, and with such a shearer—attached by a flexible wire to the dashboard—they can remove 12 pounds of fleece in five minutes.

By Ruth Rogers

A DARLING NEW MODEL MENTIFIED BY ITS RAGLAN SHOULDERS WITH PUFFED SLEEVES

The raglan shoulders in this charming daytime dress have much to do with creating sleeve interest.

It is gay red rough crepe silk. Contrast is provided by the black, rough crepe collar. Buttons give decorative touch. They are made of the black crepe with the red crepe used for the rim.

It's as simple as eating apple pie to make it.

It's a dress that you can wear for street or afternoon parties.

Style No. 348 is designed for sizes 14, 16, 18, 20 years, 22 and 24 inches bust.

Size 16 requires 2 1/2 yards 20-inch with 1/2 yard 20-inch contrasting.

Crinkly crepe satin, wool crepe, velvet and wool and crepe silk novelties are also appropriate.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

## HAPPY TO BE 136 Lbs

Lost 58 lbs. — More To Follow

Most women would be alarmed if their weight showed 136 lbs. But not this one. You see she was 174 lbs. and she has found a way to take off that disgusting overweight.

She writes:—"Six months ago, when my weight was 174 lbs., I started to take Kruschen, and have gradually got down to 136 lbs.—and am still going down. I have not altered my diet at all, and I only take a half-teaspoonful of Kruschen in a glass of hot water every morning. I also find Kruschen very good for biliousness, from which I used to suffer a great deal. But it has completely left me now—in fact, I feel a different person, and have only to thank those wonderful Kruschen Salts."—(Mrs.) M. K.

Taken every morning, Kruschen effects a perfectly natural clearance of undigested food substances and all excessive watery waste matter. Unless this wastage is regularly expelled, Nature will eventually store it up out of the way in the form of ugly fat. One bottle is enough to prove to you that Kruschen will make you feel younger—spryer—more energetic—you'll enjoy life—every minute of it.

### Complete Moth Collection

Monarchs, Moths From Everywhere Of Every Season Specimens

Monarchs has discovered heretofore the home of two of the greatest butterfly and moth collections in the world. They are owned by J. Henshaw, Winnipeg, and Jack May, of Riding National Park.

Comprising insects of varying size and design the two collections are representative of the entire world's entomological phenomena.

The "Bites" to K. is called, is the Calligramma from Columbia. South America, with two perfect specimens on its back, reading 50. Another has a death's head on its back, and still another a pair of owl's eyes. The specimens vary from the Great Hercules moth with a wing spread of eleven inches to others that are so tiny they can be hardly seen with the naked eye.

Miller's Worm Powders will not only expel worms from the system but will induce healthful conditions of the system under which worms can no longer thrive. Worms keep a child in a continual state of restlessness and pain, and there can be no comfort for the little one until the cause of suffering be removed, which can be easily done by the use of these powders, which are very effective.

In classical mythology, styx meant the place where the souls of the good dwell after death.

A gun, M. fired under water, will generally explode.

## SUNDAY SCHOOL LESSON

DECEMBER 4

LIVING WITH PEOPLE OF OTHER RACES

Golden Text: "Of a truth I perceive that God is no respecter of persons."—Acts 10:34.

Lesson: 1 Kings 8:41-43; Luke 10:25-37; John 4:3-10; Acts 10:9-19, 28-30; 17:22-28.

Devotional Reading: Luke 10:29-37.

### Explanations and Comments

Jesus Was No Responder Of Persons, John 4:3-10.—We have in this incident the example of Jesus in dealing with a representative of another race. This was our text for the Fourth Lesson of the First Quarter, and Explanations and Comments there may be recalled.

"The world manner of inter-racial friction and antagonism constitutes the supreme concrete challenge to the Christian belief that all men are the children of God."—Basil Matthews.

The Lesson Peter Learned About Other Nations, Acts 10:9-30.—While praying on a house top in Joppa, Peter had a vision of a receptacle resembling a great sheet let down from heaven by its four corners, and in it all manner of four-footed beasts and creeping things and birds, and he heard a voice bidding him kill and eat. Horrified at the thought, Peter exclaimed: "Not so, Lord, for I have never eaten anything that is common or unclean." The Levitical law prescribed what animals could be eaten and how they should be slaughtered, and all else was held to be unclean.

"What God hath cleansed, make not thou common," were the words the voice uttered to the astonished Peter. What God had made and given was good in His sight. Apart from the symbolic meaning of the vision, it was important for Peter and all the leaders to recognize the fact that the distinction of meats held by the Jews in the past must now be given up, in order that Jews and Gentiles might eat together, associating on terms of equality.

Peter was pondering the meaning of the vision when messengers arrived from Cornelius, a Roman centurion of Caesarea, a devout man who was generous to the poor. They were men of another race, whom before this Peter would have called "unclean," but with his lesson in mind Peter bade them enter and lodged them over night. The next day he accompanied them on their return to Caesarea. He took the precaution to take with him six brethren as witnesses, for he felt that he was doing a venturesome thing. Cornelius told Peter of the vision he had had, in which he was directed to send for the latter, and said that he and his friends and kinsmen were all present, "in the sight of the Lord" to hear what God had commanded Peter to tell them.

After fourteen years of flying, Douglas H. Davis, air mail pilot, of Griffin, Georgia, has completed 1,000,000 miles in the air.

A forestry course for army recruits has been instituted in Norway.

## Steamer Mined Rock Through Good Luck

Found Near Surface In Channel Of Vancouver Canal

Lady Luck has been standing on the bridge of every steamer that has navigated Melby's Cove, Clayoquot Sound, West Coast of Vancouver Island, because in the dead centre of the channel there is a pinnacle of rock that had been then fifteen feet of water over it at low water.

This pinnacle was located by the Dominion hydrographic steamer "Liberal" in the course of her charting work and a lot of mariners are shaking heads with themselves at getting over that dangerous spot without trouble.

Now ships aimed piling up on this rock is explained by the hydrographers that some happened to be in the neighborhood at low water. "Just a matter of luck," said one of the hydrographers.

### Flinty Is a Name

What's in a name?

"Flinty," said Detective Thomas Hennigan and a New York Central railroad engineer, who was forced to stop his train, climb from the cab and help shove an automobile from the railroad tracks where it apparently was abandoned. The automobile was parked on the tracks by a man named Lawitt.

Scum from water My gods are used by Indians as food, and taste like popcorn when roasted.

"I haven't been so happy for years"

"I've just thrown out all my dust cloths"

—because I've found how to do the work better, easier and quicker.

I use Applique Wonder Paper now. You buy it in a neat package that looks every beauty in a table drawer. Twenty-five large sheets for a quarter. When you use it, you simply crumple a sheet into a soft pad and go over whatever needs attention.

I've never seen anything like Wonder Paper. It really does, cleans and polishes at the same time. It takes up dirt like magic, and so easily. And you can use both sides.

What I used to bother about dusting was the bother of keeping the dusts clean. I always used cloth and such of old shirts and the like—and it seemed to me I was eternally washing them. It worried me just to throw them into a bag or cupboard. They seemed so unsightly.

The beauty of Wonder Paper is that you throw it away when you're through with it.

I can promise that you'll like Wonder Paper. It gives you time for things very much more attractive than dusting.

### Special Offer

WONDER PAPER is made by the makers of the famous PARA-SANI Heavy Waxed Paper in the Green Box. Best grocery, hardware and department stores have Applique Wonder Paper in stock. If yours hasn't, send us the coupon below and we'll give you a booklet entitled "Lifelines", containing one hundred recipes, as a bonus for your trouble.

Applique Paper Products, Ltd., Hamilton, Ontario.  
Enclosed find 5c for which please send me one package of The Wonder Paper and your 100 recipes for "Lifelines".

## Do You Know?

—Bulldog Photo Being Taken

THAT in many parts of northern British Columbia the Indians, in addition to smoking before going to commemorate the death of some members of the tribe, also build grotesque figures to frighten from the village and out spirits so may wish to work harm upon its inhabitants? Here is pictured one of the animals—a specimen that perhaps at Kamanga in northern British Columbia.

## U. S. IS AGAINST MOVE FOR DEBT CANCELLATION

Washington.—Continuing a rapidly moving picture of war debt discussion, President Herbert Hoover launched—with the knowledge of President-elect Franklin D. Roosevelt—a request that foreign debtors meet the December 15 payments on their war debts to the United States.

Simultaneously and in the face of congressional opposition, he proposed legislative creation of an agency to review international financial pledges in connection with world economic and disarmament problems.

In view of determined objections made on Capitol Hill, especially by Democratic powers in the House, there seems little chance for such a United States commission.

Only a few minutes before Mr. Roosevelt left Washington and shortly after an extraordinary conference of congressional leaders at the White House, Mr. Hoover issued a lengthy formal statement declaring flatly against debt cancellation but suggesting "other forms of tangible compensation than cash."

Immediately there followed a chorus of mixed approbation and opposition. One senator and representative after another declared against a commission to review the debts. The same men, however, expressed approval of Mr. Hoover's stand against further moratorium or cancellation.

Some congressional leaders told President Hoover at the White House conference that he already had power to negotiate or set up a commission such as he proposed to negotiate with Great Britain, France and other European powers. The same view was echoed later by other prominent members of congress who did not attend the meeting, but in administration quarters it was held the executive had no such power.

Speaker John Nance Garner, the vice-president-elect, who led the Democratic contingent into the cabinet room conference at the White House, and later into party with Mr. Roosevelt, reiterated in public a belief expressed by several at both meetings.

"Let them default," he exclaimed in answer to questions. "Who said they would default? They won't."

## Relief On Mortgage Payments Is Sought

The Five Cent Interest Cut Asked By  
Fannie Franchise

Ottawa, Ont.—Efforts to free prairie farmers for one year from mortgage interest and to persuade mortgage companies to reduce interest rates by one per cent. were put forward last week by western provincial treasurers in an interview with officials of these companies.

The interview, it is understood, took place at Toronto, and the reply given the treasurers is not known here.

It is understood, however, that the companies pointed out that few if any foreclosures are being sought for arrears of interest, and that the companies are dealing generously with farmer debtors on the prairies.

## Church Union

Australian Making Study Of Church  
Union Systems In Canada

Ottawa, Ont.—"I don't think there is any chance of stopping union," declared Lieut.-Col. the Rev. A. T. Holden, D.D., president-general of the General Conference of the Australian Methodist Church, and chaplain-general of the Australian military forces who was a visitor in Ottawa. Col. Holden is making a trip across Canada for the sole purpose of studying church union as it exists in this country, so that he can put forth proposals in his own country for the union of churches.

During the months from January to September, 1932, Saskatchewan coal mines produced approximately 100,000 tons.

W. H. U. 1934

## Many Questions On Beauharnois Project

Water Is Again On Ottawa Water  
Order Paper

Ottawa, Ont.—The Beauharnois power project again figures in questions placed on the order paper of the House of Commons. E. J. Garland, United Farmers member for Bow River, has a dozen queries on the order paper with a view to obtaining further information in respect to the financing of the undertaking.

Mr. Garland first asks for the tabling of copies of any arrangements which have been entered into by the government in respect to the Beauharnois project. He wishes to know the total amount of money advanced by the government to date in connection with the construction and completion of the enterprise.

"What security has the government been given for the money advanced?" he asks.

The member for Bow River asks if the government has obtained any legal opinion regarding the legal right of the Beauharnois Heat and Power Company to transmit electrical energy beyond the limits and boundaries of the province of Quebec.

"Did the minister of finance or the prime minister approve of loans estimated at \$2,500,000, made by the Royal Bank of Canada, the Bank of Montreal, and the Canadian Bank of Commerce to this enterprise?" he asks. "Are such loans permissible under the Canadian Bank Act?"

## Attack Duff Report

Labor Makes Attack On Its  
Recommendations

Ottawa, Ont.—Thousands of railwaymen throughout Canada will be thrown into the ranks of the unemployed if the Duff commission's report is adopted, the House of Commons was told when Labor made its initial attack on its recommendations.

Humphrey Mitchell, Labor, Hamilton East, estimated 20,000 railwaymen would lose jobs. Hon. Peter Heenan, who returned to overalls and a locomotive cab when he left the portfolio of Labor in the King cabinet, placed the number at "many thousands and thousands."

Brandy-railway lines would be scrapped, noted the former minister. Services would be dropped and curtailed. The Canadian National and Canadian Pacific Railways would be drawn into closer co-operation. Competition would disappear.

## May Demand Provincial Election In Ontario

Progressive Leader Will Introduce  
Amendment When House Opens

Toronto, Ont.—A demand for a provincial election next summer will be made immediately after the opening of the Ontario legislature in February by H. C. Nixon, Progressive Leader, who was in Toronto.

He declared he would introduce an amendment to the moving and seconding of the adoption of the Speech from the Throne demanding the business of the House be concluded with reasonable speed and an election called for June next.

## Alberta Deficit

Increased Revenue Shown In Provincial  
Treasurer's Report

Edmonton, Alberta.—Deficit of \$9,152,000 in Alberta provincial finances for the fiscal year ended March 31, 1932, is shown in public accounts released by Hon. R. O. Reid, provincial treasurer. This compares with a deficit of \$5,306,561 for the previous fiscal year, 1930-31.

Revenue for the year which had been estimated at \$15,441,487 actually yielded \$13,492,430, a shrinkage of nearly five million, expenditures were estimated at \$15,525,730, but were cut to \$15,645,481.

## Would Improve Bacon Hogs

Toronto, Ont.—Advocating a higher quality of bacon hog suitable to the demand of the Great Britain consumer, Hon. Robert Wair, Dominion Minister of Agriculture, addressed several hundred farmers and exhibitors at the Royal Winter Fair luncheon recently.

Herr Von Hensch, new German Ambassador to Great Britain, is shown above as he arrived in the British Capital.

## New Stamp Issue

Design Profile Of King Engraved In  
Medallion Style

Ottawa, Ont.—A new stamp issue, in denominations of one, two, three, four and eight cents was placed on sale by the post office department on December 1.

The new issue bears the profile of the King, engraved in medallion style, and is similar in design to the 9-cent stamp issued to commemorate the Imperial Economic Conference.

At the same time a new 13-cent stamp will be issued replacing the current 12-cent stamp that bears the view of the Quebec capital. The design of the new stamp will be the same as that of the 12-cent issue, but its colour will be violet.

## Reducing Liquor Prices

Victoria, B.C.—Reductions in liquor prices on all seven continental European brands, ranging from 10 cents to 30 cents a bottle, went into effect in British Columbia December 1. Hon. R. H. Pooley, attorney-general, announced Government approval has been given the new price list prepared by the liquor control board.

## For Better Understanding

Union Plan For Closer Union Between  
Britain and U.S.

London, Eng.—Speaking at a 20-grains' Society luncheon in honor of Robert Fraser, the new United States consul-general, Lord Halifax, Secretary for War, made a plea for closer union between Great Britain and the United States for the economic salvation of the world.

"Hoover has been a true man. It was more important that we two peoples should understand one another," he said. "We stood together in arms to protect civilization from violent destruction. I believe that today we, the two great cradles of nations of the world, must stand together to protect the world from economic disaster. I believe that the hope of civilization lies in fuller understanding between Great Britain and the United States."

## Talked Over Light Beam

Scientific Make Longest Message-  
Carrying Equipment On Record

Schenectady, N.Y.—A group of scientists at Schenectady talked with another group at Lake Desolation, 24 miles away, over a light beam projected across the lower Adirondack mountains.

It was the longest narrow-beam experiment on record. During a part of the experiment John Bellamy Taylor, who developed the method of transmitting sound over light waves, was interviewed by Raymond Brown, newspaper columnist, who was at Schenectady, while Taylor was at Lake Desolation.

A searchlight mounted on a building at the General Electric Company's plant projected the beam upon a 50-inch mirror which was part of the receiving apparatus at Lake Desolation.

## No Jobs In Jerusalem

Not One Man Unemployed Statement  
Of Jewish Leaders

New York.—Three Jewish leaders from Palestine, arrived on the "Berengaria" on their way to a convention of the American Hebrew organization in Buffalo, boasted that their city is the one place in the world that has not one unemployed man.

One of them, Aron Dikman, said the Jewish population in Jerusalem has grown from 50,000 in 1917 to 230,000 today.

Since that October day, ten years ago, when the black-shirted legions, led by an obscure unknown agitator, Benito Mussolini, marched into the Eternal City and started Italy on its march to greatness, many changes have taken place in the land of the Canons and Popes. The most remarkable of these changes, to the Italian mind, has been the change to power of Mussolini. His word is law in every corner of the country. He is loved by many, feared by many, hated by many—but obeyed by all. Fewists claim that if Duce has built up the economic structure of Italy to a position it has not enjoyed for decades.

## MORE DIVERSITY OF PRODUCTION ON THE FARM

Toronto, Ont.—Radical changes are required in western Canadian agricultural practices before the picture of "prairie" economic picture is again bright, in the opinion of a prominent Toronto banking official quoted by the "Mail and Empire."

Just returned from a month's intensive study of conditions and prospects in the west, the banker advocated turning the bulk of Manitoba's wheat lands into grain for cattle. That, he suggested, would permit the livestock areas suitable for wheat alone to retain this as a major crop without competing the market.

Alberta, he stated, already was well on the way toward a more balanced production. However, greater interprovincial co-operation was required before the problem finally could be solved.

There must, in the banker's opinion, be drastic curtailment of wheat acreage in western Canada, and he suggested the best method of attaining it would be through interprovincial co-operative measures leading toward a planned and co-ordinated diversity of production, allocating to each area the new crops and types of livestock it was best fitted to produce.

Western Canada could not get along with general comfort throughout all its sections as long as wheat prices at Fort William were less than 35 cents a bushel. Readjustments already made had placed the average farmer in the position of being as well off with wheat at 30 to 35 cents as he was three years ago when it was selling at \$2.

Some communities and individuals had reorganized their production. They were doing well with 35-cent wheat, the banker stated. Others in such areas as southwestern Saskatchewan had not yet exhausted their cash resources from former years. Thus, there was by no means a uniform condition throughout the west. Bright spots were sufficient in number and variety to mitigate the gloom cast by others.

## New Bacon Policy Will Benefit Canada

British Markets More Open Than  
Ever For Product

Toronto, Ont.—"Canada will benefit automatically in the new policy by reason of the 200,000,000 pounds of bacon per year," declared J. B. McLean, of Canada Packers, Limited, in commenting on Great Britain's policy with regard to bacon restrictions which are now in effect.

"Her market will now be more open than ever to receive this Canadian bacon, which will take care of about 50,000 hogs a week," he said.

Great Britain has started cutting down on her imports of bacon from foreign countries. She is doing this essentially as a preliminary to building up her production.

## Oil From Oklahoma

Estimated Of Crude Oil Leaves  
Sufficient For Export

Lawton, Okla.—A trainload of 40 cars of crude oil will leave here for the Imperial Oil Company, Regina, Sask.

The train will provide 120 working days for railway employees in Canada and the United States. The railroad men call it the "King George Special." It is the first trainload of Oklahoma crude oil to be shipped to Canada in months. There used to be three a week.

## Don't Better Than

Toronto, Ont.—President Frank J. Ralph told the annual meeting of the shareholders of the Imperial Bank of Canada here today there is a greater feeling of optimism throughout the country than there has been for two years. That opportunity is offered by developing business due to the Imperial economic conference, and that further developments may be expected from the coming world economic conference.

### Avoid "Autobutaries."

Not because the garageman needs the money & not just to co-operate with the insurance company; not even to prove yourself a good citizen—but for purely selfish reasons and for your own personal profit, take a look at the calendar and appreciate the fact that slippery pavements are here again. Then have things done to your old bus so you can drive with mind free and conscience easy. Perhaps you remember the "autobutary" which goes like this:

He neglected to have  
His brakes adjusted,  
Fourteen ribs and  
A collarbone busted.

### The Rural Telephone.

Some of the reasons given for the increasing number of rural phone disconnections are improved roads, the radio, and cheaper motor cars. Hon J. B. Brownlee is reported to have stated last week that the telephone department is one of the biggest problems with which the government has to deal with at the present time, confirming recent rumors that the rural phone system is having its difficulties.

Years ago the phone was a necessity on the farm, if farmers were to keep up with the change of their communities. As a result of this demand for phones the government built up an extensive organization. Rural residents find now that they have the telephone heat, as it is just as easy to jump in their car, -pin along to their neighbor or to the nearest town, as it is to phone. When a piece of equipment breaks the farmer, instead of making a phone call to his implement dealer, hops into his car and goes to town for the required part.

### Farmers Holding Their Grain

The general policy of wheat holding which has been followed by farmers in many parts of the province since September is becoming quite noticeable, and is a sure indication of the determination of Alberta farmers to not part with their grain at present low levels.

Grain holding by growers on such a large scale is said to be innumerable exporters at Vancouver, who are said to be experiencing difficulty in filling their contracts, in some cases paying a premium for the grain.

Farmers are holding for higher prices and storing the grain on their own farms to avoid storage charges. When sales are made, it is only for the purpose of meeting pressing debts. Wheat holding is strongest in the Red Deer and other central Alberta districts.

The farmers of Alberta still have before them the call of the grain growers of Ramsey district to declare a strike and refuse to seed spring wheat in the spring of 1933 as a protest against present prices. No concerted action on the call has yet been taken by organized farm associations.

### New Date for Car Licenses Proposed.

The Alberta Motor Ass'n have made representations to the Government to have the date for issuing of motor car license plates changed from Jan. 1 to March 31, to correspond with the date of the start of the province of Alberta fiscal year. Some of the reasons given for wanting the change are:

That issuing licenses in the month of January is discouraging to the operation of motor vehicles in winter months.

The necessary expenditure for licenses in January of each year has resulted in many car owners laying up their cars until spring.

If the date were changed to March 31 garages, service stations and the like would experience greatly improved winter business because of increase in number of cars in operation.

### The Use of Chemicals Pays the Grain Grower.

Costs of production being of great interest to the wheat grower, farmers who have used commercial fertilizers in the past four years are convinced that it pays because an average increase in yield of 10 bu. per acre and a gain of 10 days in maturity has been secured, said A. G. Park, supervisor in Northern Alberta for the Consolidated Mining & Smelting Co.

"Many farmers see the increased yield per acre and the advantage of earlier maturity as what may be the only profit in the crop. Given any break at all in the matter of better prices for wheat, practically all the farmers who tried commercial fertilizers in 1932 will again be users in 1933, provided they can finance the outlay, as there is no inclination to go into debt."

"During the winter, the machinery of the company will service 2000 sower attachments on the prairie fitted for the distribution of chemicals with the seed grain. With better wheat prices, would expect to see 10,000 sower attachments in use in 1933 as several implement companies are making them."

## Montreal's "Radio Police" Get The Air

A PAIR of glass steel antennae towers, rising one hundred feet above the roof of police headquarters on Concord Street, is the only visible indication that the general public has of the Police Radio System which will be officially put into operation this week by Foreman Delorme, Director of the Police Department of Montreal.

That the new radio system will be of value in the suppression of crime is indicated by the fact that while the preliminary tests were being carried on during the installation of the system a call came over the air to the test car driven by a police officer who made the first radio arrest in the Montreal area. Several other arrests have since been effected during tests.

### CHAPTER II. A Northern Man

At Fort Endurance, in his big three-roomed cabin overlooking the rest of the post, Alan Baker was changing uniform and making himself regimental again, after a four-day patrol in a camp of drunken Haves.

Just turned thirty, tall and lanky and powerful of body, Baker had shaken off the last vestige of an unhappy boyhood and his three harrowing years across. He was in the prime of virile and hardened manhood. Coming here to Endurance as a corporal seven years ago, with Jimmy Montgomery and Carl Spaulding as his constants, he had speedily showed his worth as a "northern man" and a detachment leader able to cope with frontier problems. To him it was like coming into his own. In his boyhood he had daydreamed of hunting big game; and here, at this post just beneath the Arctic circle, those daydreams had been realized, though in a strange way. For here he had hunted the biggest of big game—human game that had intelligence to match against him; that carried a rifle in its hands, and wore a belt-gun, and must be captured alive, at risk of his own life.

During the years that he had been officer commanding here, he had built up an enviable reputation. With his gradually increasing pack of northern men he had successfully brought his big territory through Indian troubles and epidemics, and had smashed those lawless elements that came in with the oil-prospecting rubber facies or south.

With a record like that and with Superintendent Williamson as his friend, Alan had expected to get his commission but felt when the post was raised to an inspectorate. No one in all the Three Rivers country doubted that Baker would be the chosen man. To them, to Alan, the blow came unexpectedly. A political appointee named Haskell, a newcomer to the Force, a worse than raw newcomer to the North, got the inspectorship and command of this coveted detachment.

In those last months, Alan had been very thoughtful about his future. Here, at thirty, he found himself in a blind

alley, a man-on-a-manger pay, with no hope of promotion. He had turned down the opportunity of going into a big mining company that was prospecting by planes through Alaskan country. He had refused half a dozen offers that held prospect of advancement and fine money. And then the Force that he had given such loyalty to had betrayed him. Worst of all, most stinging of all, he was forced to manage this territory still, straightening out the mistakes and enforcing the irregularities of the man who had got the place he himself had earned.

As he brushed his sandy hair and dressed quickly, Alan's glance strayed down the slope to Mrs. Drummond's flower garden. Elizabeth Spaulding, his fiancée, the sister of his dead partner, was there.

And Inspector Haskell was there with her . . . that blue and gold of his uniform, through his shirtings. Alan wondered how many hours Haskell had spent with Elizabeth in those last four days.

Commanding all the other buildings at Fort Endurance, Alan's cabin, which he and Carl Spaulding had built for themselves one summer, was light and airy, homelike with fireplace, bookshelves, radio, flower pots on the ledge; and comfortable with good furniture which Jimmy Montgomery had turned over to him when Jimmy's young wife died. But in spite of the comfort after barracks life, the cabin was lonely to Alan. Eighteen months rolling by had not made him forget a dead partner. Every log and every nail in the building held some memory of Carl Spaulding; and Carl's picture, his shavers, his empty gun, were poignant reminders of that fatal patrol a year ago last January.

When he finished dressing, Alan stepped over to a deep alcove, a sort of nursery and study—a tiny shrine for a man so tall and lanky. Above the work table hung a shelf of dog-eared books and three pictures framed in carved walrus ivory. One was of Elizabeth Spaulding taken two years ago when she came down north to the Waterways country to live with Carl, her brother. Another was of Jimmy Montgomery in jaunty "walking-out" uniform, taken before Jimmy got his run down from headquarters and brought out of the Mounted.

The third was of Carl Spaulding. And that picture, framed with the chevrons and the belt-gun, hung more prominently than even the other two, so though, with that face always in front of him, Alan felt less lonely for his dead partner and could imagine Carl here in this cabin still.

In Carl's death he had lost the best and truest friend he had ever had or ever would have; and he knew that through all the years of his life he would be lonely for that strong hand-clasp and a voice he once had known. From a pigeonhole between two logs—a secret mailbox for himself and his hard-working men—Alan pulled out a scribbled note from Corporal Bill Hardwick. He had to smile as he read, for the note was as like Bill.

"Somebody found an awfully dead Husky on a trail bar down river this side the Big Alouka. Alan. He probably got drowned in the boat-up but I'm going down to see who he is so's he won't be drawing twenty money by people for the next 30 years."

Alan sat down to write out the report of his last patrol. But his thoughts strayed to Elizabeth in the garden; to Haskell, there with her. He knew that there he got in contact; was sent on, those trivial assignments that took him away for days at a time, were deliberate on Haskell's part, to get him out of the road. With anger at this gross abuse of authority, he thought: "If Haskell could come within a mile of managing this post himself, he'd frame some detail to keep me out in the back altogether. Any person who'd wield his official power in a personal matter like this . . . They used to cut off a knight's spine with an axe!"

There was little justice in Alan's emotions toward Haskell, but there was a sturdy loyalty and a certain blind identification of her as a girl. In that fatal patrol he and she, and suffered a mutual loss of partner, brother. During the eighteen months since then, he had been too busy around here at Endurance, far from Mrs. Drummond, with whom she was living, did not like her. To have a girl so depend-

## It does pay to "ROLL YOUR OWN"

From the standpoint of economy—think the package of Turret Fine Cut contains the makings for at least 30 cigarettes—and Chester's cigarette papers free.

From the standpoint of real smoking pleasure, there's nothing like rolling your own with the smooth, soft, fragrant Virginia tobacco that you get in the Turret Fine Cut package.

It does pay to roll your own with Turret Fine Cut.

My and my package—also in 10 lb. version too.

FREE Chester's cigarette papers with every package.

# TURRET

## FINE CUT

### Cigarette Tobacco

not upon him, not only for friendship but for maintenance itself, around a very tender and generous attitude in Alan.

But at times, deep in his heart, he was troubled about his engagement to Elizabeth. At times the fear ran in him that their marriage was going to be a terrible mistake. Something lurked in their betrothal; they weren't the deep and intimate friends they should be.

It shocked him to realize he was going into marriage with a girl knowing he did not love her whole-heart-

edly, which he kept locked within himself, telling no one, neither Joyce nor Elizabeth.

Father Charles, then, at all the people of Endurance, knew that there was something back of that engagement which Alan had kept to himself—some hidden reason, some unutterable fear, that would cripple it. At first he had thought that the prolonged shock of a partner's death had caused Alan to turn to Elizabeth; but with the passing months he became convinced the reason was not that. It was something deeper and more lasting.

With infinite sorrow Father Charles had seen Alan's fine comeliness with Joyce break up and had watched the engagement come about. He saw that Elizabeth was a wise, cool-headed girl, very clever at managing relationships for her own ends in the great post's opinion the marriage of the cool-headed, calculating girl to a man so shallow and warm-hearted, would be a sorry, sorry pair.

When Elizabeth came in the door, she merely nodded to Alan's warm greeting. In her previous times she said:

"I want to talk to you, Alan, about something very important to us both. Unless you're too busy . . ."

Her quiet, clear, her calmness, her lack of any passion, were always bewildering to him.

Waiting, patiently even he could never answer her arguments, he glanced out the window at the river and shimmering pine hills. A mile down the broad Mackenzie a canoe, a small patrol craft with national colors, came whirling toward a head-land.

Alan thought: "That's Bill Hardwick coming. And coming with open, something's happened."

Elizabeth saw the craft, too. But she glanced only once at it, calmly unconcerned. Police work—patrols, arrests, map surveys, treaty signing, jobs to be done, following Indians—all this bored her, now that the novelty of it had worn off.

She loved Alan—with reservations. She admired his natural-born leadership, gave other men; admired his rugged beauty, especially in contrast to Haskell's lack of it. In their life together Alan would always be loyal to her; she would always depend upon Alan Baker. And he would get her what she wanted of life. Much better

than he himself did, she realized he had qualities that would take him far in any other profession; a good fighter, excellent, the ability to work hard, and—most valuable of all—a rare capacity for friendship.

All in all, Elizabeth felt that if only he did not choose to marry himself here in this northern backwoods Alan Baker was by far the finest man, of the four or five she had known well, to lift her out of great poverty in a more agreeable place of life.

(To Be Continued.)

What mothers who know the virtues of Mother's Own Warm Balm should always have it at hand, because it proves its value.

Many sales offices have been reported in Scotland this year.

Books have risen 70 per cent. in Copenhagen since 1934.

## SAIL to the OLD COUNTRY for CHRISTMAS

## Hunting Tales from the Mountains.

There are problems and possibilities in hunting in the Mountains, according to reports received by the Fish & Game Dept. of the C. N. Ry.

In a Nova Scotia district, a hunter making his morning run, blew his nose in a manner which suggested the snort of a deer in a passing hunter. The hunter received some breakfast in his neck when the hunter fired at the supposed deer.

A colored hunter of Yarmouth County is bewailing the loss of an antelope for a moment by a two-wheeled hunter who failed to see his game clearly enough before shooting at it.

In Digby County, Capt. Keadon, a well-known hunter, shot a deer in his pasture.

In Shelburne County a hunting party secured a fine success and borrowed a farmer's car to bring in the trophy. While loading their first deer on the car, another magnificent bull walked out of the bush onto the road and stood within range. One of the hunters fired from behind the car, secured his trophy, with the result that two moose were loaded in instead of one.

## A Record Hunting Trip.

In the Rocky Mountains hunting territory near Mount Robson, on the C. N. Ry., Carl H. Reed and Fred Johnson, both from California, set a record for a three-day hunt with Ray Margrove. Reed got 1 moose, 1 caribou and 1 Rocky Mountain goat. Johnson got 1 moose, 1 caribou, 4 goats, 1 single deer. "Chuck" Chesser, a former resident of Stony, was with the party.

## Hardships of a Hunter.

The party of big game hunters which left last week with a team and sleigh for Rocky Rapids is expected back by Saturday. A message from them yesterday says the game is plentiful but the snow is deep; and that the young member of the party had been lost for awhile and had to shoot a big moose every evening to sleep in the night, and, besides, he had no tent.

Out of the bush onto the road and stood within range. One of the hunters fired from behind the car, secured his trophy, with the result that two moose were loaded in instead of one.

## Junior Hockeyists, Attention!

The following players will please turn out in uniform to the initial practice there, night, 8:30 sharp: B. Major, O. & L. Wedel, John Kulak, E. Schuch, E. & B. Lory, O. Oppertshauer, M. & W. Loran, Ed. & Emil Ruders, Lee Miller, H. Feller, H. Stach, Alvin Wilke.

A meeting has been called by the president for the Junior club to be held at the local rink after the practice, so all should be present.

The Junior management is this year confronted with the problem of filling 3 gaps in this year's team by the loss of Art Davis, the left-winger, who has left town; George and Otto Miller, defencemen and right wing respectively have gone to senior company. Games are being arranged and a schedule will shortly be issued.

A challenge has been sent to the Seniors for an early game, for the purpose of raising money for new skis. Watch for the date of this game.

## Holborn Happenings.

The U. F. Juniors held their social meeting Sat. Nov. 30. The business was ended with the reading of the Junior Herald, which caused a great deal of mirth.

Great credit was given to Elsie Anderson, the editor, for the way in which she edited the paper. This paper is growing larger, and will prove a great success in future.

After the business and the paper a very enjoyable evening was had by listening to a short program put on by the members and playing games. Mr. and Mrs. Sieber, also their daughter, were honored visitors. They added a few community songs to while away the evening.

Mr. and Mrs. Anderson, after arriving home that evening found their house full of smoke. The disaster was caused by an unsecured draft on a kitchen stove.

One of the local sportsmen, "to live things up a little," so he said, had a little runaway at Mr. Williams's place. The horse took him and sled for a smart sprint, ending up in front of the house, with no serious damage done and a severe lecture on horse manners by Mr. M.

"Belle," poor old soul, passed away Friday morning from a stroke of paralysis. This was one of Mr. McKinnon's old homestead horses and he certainly was loath to see her go.

Many pedestrians of the Stony Market road have seen a little caravan covered hand-made sled glide silently along the way. From its top protrudes a stove pipe belching clouds of smoke and between the shafts a black horse. The hand-made caravan comes out of the mist, its purpose unknown, and it swiftly glides back again unobserved.—H. J. E.

The Community dance at Holborn Hall Friday drew a good crowd. Another dance is billed at the Hall for Friday, Dec. 6th. Gents 25c, ladies free. Ursel's 3 piece orchestra.

Thurs. Night's Rally!  
Junior Hockey Players,  
At the Gus Zucht Rink.

## The Whist Drive.

Quite a large number were present on Friday evening at the whist drive and "at home" given by the officers and members of the local Seniors lodge, in their hall, including a number of visiting brethren from the City lodges. The winners at whist were:

Men's 1st, A. Anderson, 2d A. Fischer.

Ladies' 1st Miss Marie Thompson; 2d Miss Mowat of Edmonton.

## Ladies' Curling Club.

At the annual meeting of this club in the town hall on Tuesday, Nov. 22 the following officers were elected—

Pres., Mrs. H. Oppertshauer  
V. Pres., Mrs. E. Ruders  
Sec-treas., Mrs. W. E. H. Lewis  
Executive Committee, Mrs. R. M. Outway, F. W. Yeats, W. J. Connolly.

Skips, Mrs. R. M. Outway, H. Oppertshauer, E. M. Outway, F. W. Yeats.

The date set for the first game is Tues. Dec. 4, and the ladies are all enthusiastic and ready to "go again."

The Club welcomes any new members who wish to join.

## With the Curlers.

At a meeting of the Curlers held Monday night the rink for the coming President vs. Vice-Pres. draw were chosen by these officers—

President—  
J. W. McCulla  
R. E. Wood  
George Oppertshauer  
H. Oppertshauer  
Vice President—  
W. J. Connolly  
F. W. Yeats  
W. E. H. Lewis  
O. G. Wedel

The Dr. Outway rink will play each team in turn, and the wins and losses are marked against the side on which he plays each game.

The rink is in excellent shape and the above draw is expected to start with the coming of favorable weather.

## Brightbank News.

Mr. Don McDonald, H. Lata and J. Young, the well known big game hunters, are leaving in a few days for Fort Assiniboine district, in search of game. They will also do some prospecting.

H. Lata of Rocky Rapids, has returned to his farm in this district to heal his crop. He reports crops very good in Rocky Rapids district.

Miss Sheila Young, the well-known business, returned home with some big moose meat a few days ago, after being out only a short time.

Banner has it that a local man has a contract watching live squirrels for an Eastern firm, who will train them for watching contests.

## Church Services.

English Lutheran services will be held at St. John's Lutheran Church, Blueberry, on Sunday, Dec. 5th, in the afternoon at 2:30 o'clock. A cordial invitation is extended to all. Rev. H. Koring, Pastor.

German Lutheran services will be held in Stony Plain next Sunday at 2:30 p. m.

Services in St. Philip's Church next Sunday, 7:30 p. m.

United Church services every Sunday Evg. at 7:30.

On Sunday Dec. 15 there will be Lutheran services at St. Matthew Schoolhouse at 7:30 p. m., by Rev. H. Koring.

## The Sun's Calendar.

- DISCUSSION—
- 1—Sale at Carl Wedel farm, two miles west of Carleton.
  - 1—Town Council meets.
  - 2—Concert and Dance in Moose Hall, by Stony Plain Women's Institute.
  - 2—Dinner at Mole Lake Hall.
  - 3—Banquet at St. Matthew School No. 2.
  - 10—Reception by the Editor, for visiting telegraphists.
  - 10—Concert in Moose Hall.
  - 17—Auction sale at the End Livestock Barn.
  - 28—Christmas concert, Remondal School.
  - 23—Holborn & Tremont schools concert.

## Bazaar on Saturday Next.

The Ladies' Aid of the St. Matthew Church are putting on a bazaar and sale of home cooking next Saturday afternoon, Dec. 2, commencing at 2 p. m., St. Matthew schoolhouse, in Stony Plain, is the place where it will be held.

## Stony Plain and District.

A report received from the Misericordia hospital today says Mr. Christie is so much better he will be able shortly to return to Stony.

Mr. John Babulaska, a pupil at the S. P. High, whose life was despatched on the 20th ult., is now on the way to recovery, at his home in Carleton.

Mr. and Mrs. Michael were Sunday visitors in Edmonton.

Mr. C. Lory was a business visitor to the City on Monday.

Carl Peterson, of MacKay, paid Stony a visit on Monday.

Mr. and Mrs. J. A. Barrie have decided to spend the winter on the West Coast, and are now located on Esquimalt ave., Vancouver.

Miss Magnus Larson, one of the town's young sportsmen, received the congratulations of his friends on Sunday last, it being the 21st anniversary of his natal day.

Tomorrow night, at Moose hall, the Women's Institute is putting on its annual show. The program consists of musical games, recitations, and a short play "Thru a Matrimonial Harmin." A dance follows, with good music.

Mr. Hittner, leader of St. Philip's church choir, has arranged a very choice program for the Christmas concert to be held in Moose Hall on Friday, Dec. 14.

A carload of apples will arrive in Stony Plain about the middle of the month, and will be sold at auction by Mr. Zucht at the Stockyards on a date to be announced.

A hockey game is promised for next Sunday on the local rink, Mr. Zucht and the Weather Man permitting.

The Hope Winos, Edmonton, is asking farmers of this district for donations of butter, meat, whole wheat, for distribution among the City's poor. Donations may be left at the Harwick Departmental Store.

## REPAIR WORK!

All kinds of Carpentery, Plastering, Brick Work, and Repair Work on Buildings.

Mr. Val. Pailor,
